

Techwave

Techwave established in 2004, is a global end-to-end IT services & solutions company, which develops long-term relationship with clients by leveraging unique delivery models and expert frameworks.

IBM Cloud VMware VCentre Infrastructure

Overview:

SAWTEL develops and delivers services in strategic technology and business partnerships with leading telecommunications, hardware, and software providers.

Challenge:

SAWTEL has asked for Implementation of IBM Designed Solution on IBM Cloud VMware Vcentre Infrastructure and Managed Services for the same.

Solution:

- S 14 VMware Server instances with BIG IP F5 Local Traffic Manager
- Load Balancer is secured by FortiGate Unified Threat Managed virtual appliance.
- This infrastructure will be connected to their on-Premise through a VPN connectivity.
- Implementation of IBM Designed Solution on IBM Cloud VMware suite

Outcome:

- IBM cloud infrastructure ensured Sawtel's customers utilize services such as IaaS, PaaS and SaaS
- Configuration of VDOM network enabled separate firewall policies, routing and VPN services for each connected network
- Big IP F5 load balancers helped distributing data traffic across servers. It also helps increase system capacity, with a fast and seamless delivery of packets
- Veeam backup & restore solution helps SAWTEL to have seamless backup and restore operations
